

Notes on SWS-Hosted

The Speedwell Weather System (SWS) is available as an internally installed application or as a hosted application.

As a hosted application, SWS is run in on a dedicated virtual machine at our secure data centre and accessed through the internet. Microsoft Office Word™ and Excel™ are installed.

Access Options

- VPN Connection, using Remote Desktop Connection
- Citrix Server is available as an extra cost option

Database

Each client is allocated a separate database to maintain security and confidentiality.

The allocated database size is 50GB. Additional allocations of 50GB allocations are available on request at additional cost.

Backup

The database is backed up on a separate RAID array every night. Transaction log files are backed up every 15 minutes.

Number of Users

Single user licence: Single connection

Two user licence: Up to two simultaneous connections are available as standard

Three user licence: Up to three simultaneous connections are available as standard

Enterprise user licence: Up to four simultaneous connections are available as standard but with no limit to the number of client logins. If additional simultaneous connections are required, these can be provided at extra cost.

Data Centre Information

Tier 3 as per TIA942

Redundant air-conditioning system

UPS
