

# **Introducing Instant Indicative Pricing**

weatherXchange is pleased to announce the inclusion of Instant Indicative Pricing as part of Version 4 of the weatherXchange® Platform. Instant pricing is provided by multiple Protection Sellers based upon their internal pricing algorithms.

#### How it works

Instant pricing is designed such that immediate pricing feedback can be incorporated into the process of structuring a hedge.

- Step #1 Design a hedge using the weatherXchange structuring wizard
- Step #2 Click "Get Automated Indicative Prices", and view pricing from each Protection Seller
- Step #3 Modify the structure if needed and then reprice
- Step #4 Once satisfied with the structure and indicative cost they request firm pricing

### **Benefits**

- Reduces the lead time required by Hedgers to create a structure that meets their hedging needs and their budget.
- Increases market transparency.
- Allows Broker-Advisors in client-facing situations to immediately show the impact of "tuning" a hedge.
- Database of pricing requests provides

# **Participation**

weatherXchange continues to expand the number of participants on the Platform. New Protection Sellers, Broker-Advisors and Hedgers are all welcome to join the weatherXchange Platform.

# **Summary**

- Instant Indicative Prices are currently provided by five Protection Sellers.
- Pricing is based upon each company's proprietary automated pricing algorithms.
- Pricing is indicative. Final prices may vary depending on factors such as market conditions, credit risk, portfolio compositions and legal and administrative fees of certain jurisdictions.
- Firm pricing can still be obtained from all Protection Sellers by using the "Get Firm Price" button.
- Instant pricing can be incorporated into the structuring process such that users can better understand the impact of structure modifications on prices.
