# **Forecast Dashboard: Getting started**

The Speedwell Forecast Dashboard is a fast and convenient way to view all of your downscaled forecast products including single sites and baskets.

## Viewing Different Ensembles and Forecast Runs

- The ECMWF & GFS Operational and Ensemble forecasts are available for selection using the buttons at the top
- The latest runs can be accessed via the +/x button
- Daily TMin, TMax, TAve and Precip forecasts can be viewed
- Note the inks to other important tools through the icons at the top right:

Inspect All

Flex GB (excl N Ireland)

## Viewing more information for a site

- Click the *Inspect* icon, next to the site of interest as shown right
- The site's forecast graph and a numerical table appear below the main grid.
- View the Graphical Forecast Viewer via the left hyperlink
   All the ensembles can be viewed here
  - e.g. ECMWF, GFS, Speedwell, Operational
- Detailed statistics are available via the right hyperlink -e.g. Climatology, Medians, Quartiles

## Forecast Dashboard: Getting started

## Creating your own groups

Users can create an unlimited number of groups sorted in any order with any combination of forecast sites including baskets My Groups O Std Regions

- Click on the My Groups hyperlink
  - AAA Europe FlexIndexes 🔻
- To create new group of stations, select "New Group"
- The sites for selection into your group reside on the left
- Your user groups are shown in the list on the right
- Add sites to your group by clicking the + button on the left
- One-click add all stations from that country, if required
- Remove sites from an existing list by clicking the button
- Sites can be sorted by dragging and dropping or by selecting one of the sorting options:
  - Station Station Latitude Remember to save any changes by Longitude WMO Country

## **Viewing Model Comparison**

clicking on the disk icon

- Click the All Icon adjacent to your site of interest using the icon shown below.

- A comparison of the forecast models appears as shown right
